EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Russell Warnock on September 8, 2005.

The application has been amended as follows:

Claim 26 to "A dishwashing machine including a filter for a medium passing therethrough, comprising: a filter body including a plurality of filter openings; said filter openings each having a passage cross-section; and means for varying said filter opening passage cross-sections automatically in response to a variable inherent in the medium passing therethrough wherein said means includes a perforated plate with openings, said perforated plate being shiftable relative to said filter openings between a first position and a second position such that, in said first position, said openings of said perforated plate are at offset from said filter openings such that said perforated plate substantially screens or covers over said filter openings and, in said second position, said openings of said perforated plate are at a lesser offset to said filter openings than in said first position such that said perforated plate does not screen or cover over said filter openings to the same extent as in said first position, and at least one element acting on said perforated plate to shift said perforated plate under the influence of a change of temperature of said medium passing therethrough between said first position and said second position.

Allowable Subject Matter

2. Claims 12-17, and 20-30 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither teaches nor suggests an element acting on the perforated plate to shift the perforated plate under the influence of a change of temperature of the medium passing therethrough between the first position and the second position. Silverwater, U.S. Patent No. 4,783,271 discloses a filter having filter openings, which openings vary in cross-section automatically in accordance with an inherent variable of the medium passing therethrough but does not disclose an element acting on the filter under the influence of temperature changes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yoon-Young Kim whose telephone number is (571) 272-2240. The examiner can normally be reached on 8:30-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda Walker can be reached on (571) 272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
